Farm Management

Welcome to Orion...

We are a comprehensive land and wildlife management company based in Maryland serving landowners and hunters throughout the Mid-Atlantic States. We specialize in the design, installation, and management of high-quality habitat for waterfowl, whitetail & sika deer, turkey, quail, dove and small game animals.

My name is H. Spencer Waller,

Owner of Orion Land & Wildlife Management, LLC. I have spent the last 20 years in the farm management and wildlife habitat improvement business. I have a Bachelor of Science Degree in Plant Biology from Towson State University and a Master of Science Degree in Agriculture Extension/Soil and Water Conservation from the University of Maryland. My wife and I also operate Moonshadow Farm, a custom farming operation in Quantico, Maryland. We grow grain crops for our clients through a program called "farming for production and wildlife" which creates farm income through commodity sales while still delivering top quality habitat for wildlife.

Waterfowl

Whitetail & Sika Deer

Turkey, Quail & Dove

Other Services

Shallow Water Field Impoundments

Survey, design, and construct new waterfowl impoundments. Renovate existing impoundments and upgrade water control structures for full draw-down.

Wells, Piping & Power

Drill wells and install underground piping systems to flood impoundments. Deliver power to impoundments to operate ice-eaters.

Impoundment Planting and Blind Management

Develop custom planting, flooding, and draw-down schedules for impoundments. Construct, install, and brush Orion A-frames and pit blinds.

Field Food Plots

Design, install, and manage new field-edge food plots and renovate existing food plots. Provide annual management to keep your plots producing high-quality forage.

Forested Food Plots

Perform custom logging and thinning to create new forested food plots, widen forested openings and roadways and create shooting lanes and spokes.

Deer Stands

We are a regional distributor for *Shadow Hunter Hunting Blinds*. Let us install one on your farm or hunting property.

Native Warm Season Grasses

Design and install new native warm season grass strips and escape cover plots. Renovate existing warm season grass stands to provide better quality habitat through herbicide application, mowing, and prescribe burn planning.

Orion Sunflower Fields

Design, plant, and manage sunflower fields for the ultimate dove hunting experience.

Farm Management Plans

Once your habitat improvements have been made, let Orion keep them functioning properly through a custom, Annual Management Plan for your farm or hunting property.

Conservation Program Participation

Let Orion help you navigate the many cost-share programs available through federal and state agencies and private conservation groups. We can assist you in selecting the right programs to match your habitat objectives.
